

# Dissolver RX-05BD

## Description

RX-05BD is a complex blend of monocyclic hydrocarbons designed specifically for the removal of wax and pipe dope. For pipeline clean-outs where temperature is low, RX-05BD has a proven track record to ensure complete removal.

RX-05BD replaces hazardous aromatics such as xylene, toluene or benzene. It is equally effective but more environmentally friendly and safer to handle.

RX-05BD is not carcinogenic and not aromatic.

RX-05BD is one of our range of Pipedope Dissolver products. Each product has been developed to cater for the large variety of pipe dopes available in the Oil and Gas Industry. Recommendations and application of particular product will take into consideration many factors, including pipe dope type, temperature, pump rates etc. Discussions with Roemex representatives will allow the most effective product to be recommended and applied in the most appropriate manner.

## Application

RX-05BD may be used neat or alternatively combined with emulsifying agents and diluted in fresh water, sea water or brine. However, in certain circumstances RX-8051 may yield better results.

Roemex representatives should be consulted regarding specific recommendations for each operation.

## Properties

Specific Gravity	0.85
Flash Point	49 deg C
Pour Point	<-0 deg C
pH	N/A
Appearance	Colourless liquid
Hazard Class	Xi irritant
UK HQ Value	Gold

## Handling

No special procedures need to be observed. Normal precautions should be taken and protective clothing, goggles and PVC/rubber gloves should be worn.

## Packaging

Available in 208 litre steel drums, 1,000 litre IBC's or in exact quantities supplied in tanks of up to 4,500 litre capacity.
