

RX-9000X

SANDWASHER / VESSEL CLEANER

Description

RX-9000X is a blend of surfactants based in an alcohol solvent. It has an excellent environmental profile with a Gold CHARM banding being awarded to this product.

RX-9000X is a very versatile product and is currently used in two main applications; vessel cleaning and sand washing.

Application

Topsides Vessel Cleaner:

Operators are currently using **RX-9000X** to remove oily deposits from the insides of their topside vessels prior to carrying out internal inspections. Depending on the volume of crude contamination, we recommend applying this product at a concentration of 1% - 5%.

Sandwasher:

Operators also use **RX-9000X** to clean oily sand and water prior to dumping. The oily sand is jetted with 0.1 - 1% v/v **RX-9000X** in sand wash water. This application gives very clean sand and water along with a sharp oil/water interface. The separated oil is pumped back into the process whilst the sand and water can be dumped.

Properties

Appearance / Odour	Colourless to pale yellow, clear liquid
Specific gravity	0.90 – 0.94
Boiling point	> 150°C
pH	6 - 8
CHARM / OCNS	Gold

Handling

No special procedures need to be observed. Normal precautions should be taken and protective clothing, goggles and PVC/rubber gloves should be worn.

Packaging

Available in 208 litre drums, 1,000 litre IBC's or in exact quantities supplied in tanks of up to 4,500 litre capacity.
