Job Title:	Laboratory Chemist
-------------------	---------------------------

Purpose

This is a laboratory-based role, carrying out experimental project work to support sales of our drilling & completions, production, hydrotest and geothermal chemical product range. You will be expected to plan, carry out and report laboratory evaluations to ensure compliance with all relevant standards and legislation, primarily in accordance with ISO 9001 and 14001.

You will be capable of working as part of a team as well as with minimum supervision depending on the project requirements.

Requirements

Education:

BSc in Chemistry or equivalent Science Degree

The ideal candidates should have experience in a laboratory setting and be confident with report writing. They will be enthusiastic, organised and work well as part of a team. They shall demonstrate initiative and ownership of projects.

1-2 years' experience working in a laboratory environment, offshore experience would be an advantage.

Other Skills: Competent with Microsoft packages

Core Responsibilities and Key Tasks

- Performs laboratory assessments to evaluate Roemex drilling & completions, production, hydrotest and geothermal products
- Undertakes Research and Development projects
- Compiles comprehensive reports detailing laboratory work undertaken with defined conclusions and recommendations
- Technical support for the Production team
- Support with quality control
- Undertakes field trials of chemical applications offshore and inland locations worldwide, if required
- Any other laboratory duties as required such as stock control, calibrations and inspections.

Basic Training

- In-house training for Company work instructions (LWI's) will be provided for specific techniques.
- Online health and safety courses for working in a laboratory environment are provided.
